§ 600.306-86

the time the automobile is delivered to the ultimate consumer.

- (1) It is preferable that the fuel economy label information be incorporated into the Automobile Information Disclosure Act label, provided that the prominence and legibility of the fuel economy label is maintained. For this purpose, all fuel economy label information must be placed on a separate section in the Automobile Information Disclosure Act label and may not be intermixed with that label information, except for vehicle descriptions as noted in §600.307–08(d)(1).
- (2) The fuel economy label must be located on a side window. If the window is not large enough to contain both the Automobile Information Disclosure Act label and the fuel economy label, the manufacturer shall have the fuel economy label affixed on another window and as close as possible to the Automobile Information Disclosure Act label.
- (3) The manufacturer shall have the fuel economy label affixed in such a manner that appearance and legibility are maintained until after the vehicle is delivered to the ultimate consumer.

[71 FR 77949, Dec. 27, 2006]

§ 600.306-86 Labeling requirements.

- (a) Prior to being offered for sale, each manufacturer shall affix or cause to be affixed and each dealer shall maintain or cause to be maintained on each automobile:
- (1) A general fuel economy label (initial, or updated as required in §600.314) as described in §600.307(c) or:
- (2) A specific label, as described in §600.307(d), for those automobiles manufactured or imported before the date that occurs 15 days after general labels have been determined by the manufacturer.
- (i) If the manufacturer elects to use a specific label within a model type (as defined in §600.002(a)(19)), he shall also affix specific labels on all automobiles within this model type, except on those automobiles manufactured or imported before the date that labels are required to bear range values as required by paragraph (b) of this section, or determined by the Administrator, or as permitted under §600.310.

- (ii) If a manufacturer elects to change from general to specific labels or vice versa within a model type, the manufacturer shall, within five calendar days, initiate or discontinue as applicable, the use of specific labels on all vehicles within a model type at all facilities where labels are affixed.
- (3) For any vehicle for which a specific label is requested which has a combined unadjusted fuel economy value at or below the minimum tax-free value, the following statement must appear on the specific label:

[Manufacturer's name] may have to pay IRS a Gas Guzzler Tax on this vehicle because of the low fuel economy.

- (4)(i) At the time a general fuel economy value is determined for a model type, a manufacturer shall, except as provided in paragraph (a)(4)(ii) of this section, relabel, or cause to be relabeled, vehicles which:
- (A) Have not been delivered to the ultimate purchaser, and
- (B) Have a combined model type fuel economy value of 0.1 mpg or more below the lowest fuel economy value at which a Gas Guzzler Tax of \$0 is to be assessed.
- (ii) The manufacturer has the option of relabeling vehicles during the first five working days after the general label value is known.
- (iii) For those vehicle model types which have been issued a specific label and are subsequently found to have tax liability, the manufacturer is responsible for the tax liability regardless of whether the vehicle has been sold or not or whether the vehicle has been relabeled or not.
- (b) The manufacturer shall include the current range of fuel economy of comparable automobiles (as described in §§ 600.311 and 600.314) in the label of each vehicle manufactured or imported more than 15 calendar days after the current range is made available by the Administrator.
- (1) Automobiles manufactured before a date 16 or more calendar days after the initial label range is made available under \$600.311(c) may be labeled without a range of fuel economy of comparable automobiles. In place of the range of fuel economy of comparable automobiles, the label must contain a statement indicating that, as

Environmental Protection Agency

of the date of production or importation of this automobile, no range of fuel economy of comparable automobiles was available.

- (2) Automobiles manufactured more than 15 calendar days after the initial or updated label range is made available under §600.311 (c) or (d) will be labeled with the current range of fuel economy of comparable automobiles as approved for that label.
- (c) The fuel economy label must be readily visible from the exterior of the automobile and remain affixed until the time the automobile is delivered to the ultimate consumer.
- (1) The fuel economy label must be located on a side window. If the window is not large enough to contain both the Automobile Information Disclosure Act label and the fuel economy label, the manufacturer shall have the fuel economy label affixed on another window and as close as possible to the Automobile Information Disclosure Act label.
- (2) The fuel economy label information may be included with the Automobile Information Disclosure Act label if the prominence and legibility of the fuel economy label is maintained. For this purpose, all fuel economy label information must be placed on a separate section in the label and may not be intermixed with the Automobile Information Disclosure Act label information, except for vehicle descriptions as noted in §600.307–86(c).
- (3) The manufacturer shall have the fuel economy label affixed in such a manner that appearance and legibility are maintained until after the vehicle is delivered to the ultimate consumer.

[49 FR 13850, Apr. 6, 1984, as amended at 49 FR 48149, Dec. 10, 1984; 52 FR 47877, Dec. 16, 1987]

§ 600.307-08 Fuel economy label format requirements.

Examples of fuel economy labels for gasoline and diesel vehicles, dual fuel vehicles and alternate fuel vehicles are provided in Appendix IV of this part. Detailed printing specifications are given in Appendix V of this part, and unless otherwise permitted, apply to the provisions in this section. The Administrator may approve modifications to the style guidelines in cases where

there may be space limitations and/or legibility concerns.

- (a) Fuel economy labels must be:
- (1) Rectangular in shape with a minimum height of 4.5 inches (114 mm) and a minimum length of 7.0 inches (178 mm) as specified in Appendix V of this part.
- (2) Printed in a color which contrasts with the background paper color.
- (3) Have a contrasting border, with dimensions specified in Appendix V of this part.
- (b) Label information. The information on the label shall contain:
- (1) The titles "CITY MPG" and "HIGHWAY MPG", centered over the applicable fuel economy estimates.
- (2) The numeric, whole-number city and highway estimates, as determined in §600.210–08, as specified in Appendix V of this part. The font size of the numbers may be larger than specified, provided: that the city and highway numbers are equal in size; that the titles "CITY MPG" and "HIGHWAY MPG" are increased in the same proportion; and that doing so does not obscure the other information on the label.
- (i) For dedicated gasoline-fueled, diesel-fueled, alcohol-fueled, and natural gas-fueled automobiles, the city and highway fuel economy estimates calculated in accordance with §600.210-08.
- (ii) For alcohol dual fuel automobiles and natural gas dual fuel automobiles, the city and highway fuel economy estimates for operation on gasoline or diesel fuel as calculated in §600.210–08(a) and (b).
 - (3) The fuel pump logo.
- (4) The following phrase: "Your actual mileage will vary depending on how you drive and maintain your vehicle.", located and formatted as shown in Appendix V of this part.
- (5) The statement: "Expected range for most drivers: to mpg", placed underneath both the city and highway estimates, centered to the estimate numbers. The range values for this statement are to be calculated in accordance with the following:
- (i) The lower range values shall be determined by multiplying the city and highway estimates by 0.83, then rounding to the next lower integer value.
